Pollution buster

THE POLLUTED GRAY skies of Hong Kong has caused my skin to take on the same ashy hue. Thankfully, there are two products in the market that promise to return the radiance.

Elemis Visible Brilliance (HK\$790 for 30ml) is a radiance booster that targets the skin's metabolism to brighten and reenergize dull skin that has been stressed by pollution and lack of sleep.

It restores essential minerals such as copper, magnesium and zinc, which stimulate metabolism and collagen

production. The serum also contains natural ingredients like blonde pea, dew bean, borage oil, red seaweed and Swiss garden cress for cell renewal.

Another new radiance restorer is the P21 Marine Vitamin Mist (HK\$660 for 100ml) from Euoko, which has deep-sea marine derivatives to revive the skin.

The facial mist also contains added antioxidants in the form of extracts from multiple berries, including the much-lauded blueberry and acai berry.

Where to buy: Both Elemis and Euoko are available at Joyce Beauty. Tel: 3572-0364.
